Goals:

- Finishing of the homepage completely
- Work out JS for content generation for gallery and homepage
- JS, CSS, HTML and JSON all finished for homepage
- Start of gallery html, css, js and json at once so as to not have issues later on
- Goals mostly the same as previous
- Not going mad while working on the js because I did the html and css before js which since I use conten generation makes it really hard to work on
- Add in a js library for now thought to be used in galery
